Higher sales, price hikes help **Havells outperform Polycab**

Demand recovery may help both companies improve performance in coming quarters

RAM PRASAD SAHU Mumbai, 23 July

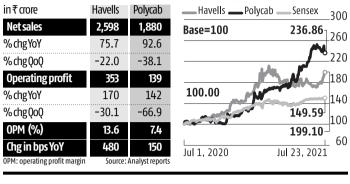

wo of the largest listed consumer electric companies – Havells India and Polycab India — posted contrasting results for the June quarter. While the former put up an improved operating performance led by a revival in business-to-business sales and price hikes, weaker business mix and muted hikes dented the latter's profitability.

Havells' revenue beat was led by stronger business-to-business performance and price hikes, Barring lighting and Lloyds business, all other segments (cable and wires, switchgears) put up a strong showing. Analysts led by Nilesh Bhaiya of Motilal Oswal Research said the 75 per cent vear-on-vear (YoY) uptick in revenues beat estimates by 27 per cent. "The two-year compound annual growth rate (CAGR) at -2 per cent — with core Havells performance showing 1 per cent growth and Lloyds being 13 per cent down — is remarkable, given the second Covid wave disruption," they added.

Though Polycab delivered revenue growth of over 92 per cent YoY on a weak base with institutional business witnessing a pick up, it was lower than analyst estimates. The lacklustre performance in the business-to-consumer segment south and west, due to extended and projects/industrial business have halved, while they are down are key to further gains.

It has raised prices by 10-15 per cent on an average over the last few months, with sharper hikes to the tune of 35 per cent in the wires and cables segment.

Polycab, on the other hand, has taken only high single-digit price hikes, with raw material inflation being in the early teens that has led to pressure on the wires and cable business.

Losses in the fast-moving electric goods segment increased owing to negative operating leverage, employee increments, and

Sit back, and let dynamic bond fund tackle duration risk for you

Risk in these funds arises from the fact that even fund managers' interest-rate calls could take a wrong turn

Among debt funds, the category that enjoys the mandate to invest anywhere is the dynamic bond fund. It can invest in high- or low-duration bonds, or in high- or low-credit quality papers.

With interest rates likely to harden, investors who are not sure about which debt fund category to invest in for a slightly longer time horizon can consider dynamic bond funds, a category with assets under management (AUM) of ₹25,611 crore at the end of June.

Rates could harden

Fund managers feel interest rates could rise. "We believe interest rates have bottomed out and could gradually head higher," says Manish Banthia, senior fund manager, ICICI Prudential Asset Management Company. Joydeep Sen, author and corporate trainer (debt market), holds a similar view.

"At some point of time, the Reserve Bank of India (RBI) will have to change its stance from ultra-supportive to supportive. Interest rates are expected to move mildly upward from here," he says.

Need for active management

Banthia believes the current environment calls for active management of the portfolio. "The yield curve is very steep currently. As we move towards

rate normalisation, the curve will become much flatter. Therefore, losses at the shorter end of the curve could be higher than at the longer end. That is why there is a need to manage duration risk actively,"

Sen says the portfolio maturities of most dynamic bond funds are not aggressive at present in anticipation of hardening of rates. Those who wish to invest in a portfolio where the fund manager dynamically changes the duration based on how market conditions shape up may invest in a dynamic bond

"Here the professional fund manager decides where the opportunities lie across different parts of the yield curve," says Vishal Dhawan, founder and chief executive officer, Plan Ahead Wealth Advisors. By managing duration actively, he tries to generate alpha.

Calls can go wrong

Those who invest in this category need to be aware that the fund manager's interest-rate calls can go wrong, thereby affecting returns. This can cause year-to-year returns to fluctuate. Aggressive credit INVEST FOR 3-5 YRS FOR SOUND RETURNS

AVG CATEGORY RETURNS TEND TO FLUCTUATE Category year-wise returns (%)

calls have also gone wrong in the past, resulting in papers being placed in segregated portfolios. Before

you invest, check the fund manager's track record in managing such a strategy. Banthia suggests checking the riskadjusted return over at least a three-year timeframe. Check the credit quality of the portfolio also. If the fund manager has to move easily from one duration bucket to another, the papers he holds should be liguid in nature. The portfolio should also not carry concentration risk (too large a portion of the fund should not be invested in a sin-

gle paper).

MONEY

In the current environment, the bulk of an investor's portfolio should be in funds that have an average duration of one year or less. To augment returns, a small portion may be put in a dynamic bond fund. "Conservative investors may hold dynamic bond funds to the extent of 10 per cent of their debt fund portfolio while aggressive ones may hold up to 20 per cent," says Dhawan. Finally, do not invest in them for the short term. "Instead of investing in a long-maturity fund, you can be a little defensive and invest in a dynamic bond fund with a horizon of three-five years," says Sen.

This would significantly improve the working capital situation/Cash flow situation of the Company as the customers would be obligated to make payment to the Company within the stipulated timelines under the Act.

**The Company is also in the process of reviewing its borrowing facilities and is currently renegotiating with lenders for lower interest rates. The Company, through this exercise, is trying to reduce its finance cost, thereby improving the overall margin.

company, inrough this exercise, is trying to reduce its innance cost, thereby improving the overall margin.
vii. During the current quarter, the Company converted its Payables to Holding Company amounting to Rs. 1,000 Lakhs into an Interest Free Loan
for a period of 10 Years. This has improved the overall working capital situation of the Company. Additionally as per the requirements of Ind AS
109, the Company has computed the deemed financial benefit on the interest free borrowing availed and the said benefit has been taken to Other uity which has improved its net worth position.

As at 30th June 2021 there are three Directors nominated by TPL on the Board of Company, which demonstrates its continuous operational a Based on the assessment performed above, the Management has prepared the accompanying financial results on a going concern basis.

. Covid-19 which continues to spread across the globe, including India, has contributed to a significant decline in economic activities an volatility in the businesses. Post announcement by WHO as a global pandemic, numerous steps have been taken by the Government and companie to contain the spread of the virus. The extent to which the business/operations of the Company will be impacted will depend on futur developments which are highly uncertain. Whilst the Company has a committed order book of Rs. 24,948.15 Lakhs as at 30th June 2021, there i considerable uncertainty regarding the extent that Covid-19 will affect the business and operations of the Company. Further, the Company ha considerable intertainty legitating the extent that cover you make the business and operations the company has carried out an assessment of "going concern", the recoverability and carry value of assets, etc. based on certain assumptions, cumulative knowledge and understanding of the business and current indications of future economic conditions and has made adjustments, whereve necessary.
